## Full Stack Developer

Experienced full-stack web developer with 3+ years in detail-oriented software design. Passionate about solving complex problems, I bring expertise in AI/ML integration. Eager to leverage proven skills in full-stack development, AI/ML, and design to elevate software quality and functionality.

## WORK EXPERIENCE

**Pibit.ai**                                                                                                 **Bangalore, Karnataka**
*SDE- Frontend*                                                                                            *June 2023- Present*
- Developed in-house tools using TS/JS to improve accuracy of document automation.
- Responsible for maintaining and deploying frontend architecture and infrastructure using AWS services like EC2, codepipeline, cognito etc.
- Developed and implemented client UI using React.
- Coordinated with the backend and AI team to improve application performance by reducing the number of API calls.
- Translate designs & wireframes from Figma into high-quality code and write user-interface code via TS using NextJs to develop the company website.

**Miho Innovations Pvt. Ltd.**                                                              **Ahmedabad, Gujarat**
*Jr. React Developer*                                                                                  *July 2022- June 2023*
- Implement responsive web design using React.Js & CSS/SCSS to ensure that our web app renders well across multiple devices.
- Design a framework by integrating REST APIs and using redux flow to create a scalable app.
- Developed and implemented frontend architecture using MERN Stack to support UI concepts with 100% accuracy.
- Coordinated with the backend team to improve application performance by reducing the number of API calls.
- Translate designs & wireframes from Figma into high-quality code and write user-interface code via javascript using React.js workflows.
- Integrated microservices & third-party apps to increase app usability.

**Bloggers Mind Pvt. Ltd.**                                                                           **Delhi, India**
*Full stack Developer*                                                                                *Jan 2021- July 2022*
- Developed web apps for various brands & consulted using React, ExpressJs, Django etc..
- Managed & developed websites for clients using ReactJS, Javascript, HTML5 & CSS and did UX writing.
- Communicated with designers to convert mockups into working client-side code.
- Developed landing pages for various campaigns for brands such as Vivo, PepsiCo India, Saffola, Bajaj, Sopra Steria India + Benelux, TCIL, Driv, SEB Group etc.

## Projects

**Entertainment Suggestion AI**
*A full stack web app made using NextJS & openAI API*
- Created a full-stack NextJS app that suggests movies/ books/ series based on your likes.
- Integrated openAI API to create REST API in the app and designed prompt to get accurate responses.
- Developed the web app to be fully responsive using Tailwind & CSS modules.
- Used FIGMA to plan wireframe and UI design.
- Deployed the app on the Vercel platform.

**Blogger Gram: a live-chat + microblogging app**

*A [full-stack](full-stack) CRUD [web app](web-app) with live chatting made using the MERN stack*

- Developed a full-stack app where you can signup/in, create/edit/delete posts & comments and chat with live members.
- Created a signup flow and integrated JWT for user authentication.
- Implemented backend of blogging system by making REST APIs in ExpressJs/ Node.js framework to perform CRUD operations with posts and one level of commenting.
- Used MongoDB to create different schemas and collections for the database.
- Used ReactJS to create the front end and made it fully responsive using CSS & Tailwind.
- Used socket.io to create a live messaging module.

## SKILLS & INTERESTS

**Programming languages-** Javascript/ Typescript, Python, Dart, SQL.
**Technologies-** React, NextJs, ExpressJs, NodeJs, Django, Flutter, FastAPI, MongoDB, AWS.
**Miscellaneous Skills-** Figma, Graphic Design, UI Design, UX Writing, Github.
**Interests:** Reading, sketching, archery.
